The Idea Behind My Camp (online business)

1. *Shifted focus* from teaching content to *teaching learning principles*

I started working as a spoken English tutor right after graduation. During tutoring sessions, I noticed that speaking effectively requires a huge amount of input. Many input tasks are best done independently, because students can focus better when looking up new vocabulary on their own. With the help of AI, the barrier to learning a new language has gradually decreased. What my students need most is not me “teaching” them words and sentences, but the principles and methods that will support them throughout their learning journey.

4. *Implemented the system* using a collaboration and productivity app

I turned this idea into reality using all-in-one productivity apps like Notion and its Chinese equivalent, FlowUs.

2. *Identified* uncertainty as the main *barrier* to self-learning

In the meantime, I realized that not knowing exactly what to do, and not knowing whether they are making progress, are the biggest obstacles in self-learning. These uncertainties stop students from taking initiative.

5. *Grew users* via Rednote and expanded with trained tutors

Over time, I attracted more students/users by creating video content on Rednotes, arguably one of the most popular social media apps in China. As the number of students grew, so did their needs. Some wanted one-on-one sessions alongside a customized learning webpage. I started recruiting and training employees to run sessions with students.

Intro

3. *Built* a structured *platform* for guided learning and progress tracking

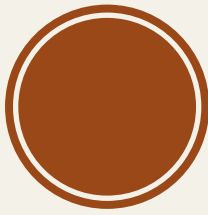

Over time, I developed the idea of building a platform with all the materials, including videos, audio, transcripts, and detailed instructions, so students/users can simply follow along. I also wanted each person to have an individual, interactive digital learning page where they can take notes and upload assignments in the form of video, audio, and photos. This way, they can compare the audio they upload on the first day with the one they upload a month later and get a first-hand sense of the progress they have made. I believe this feature is crucial for helping them maintain the habit.

6 *Created a dashboard* to manage sessions and operations

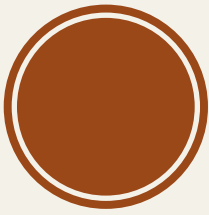

I designed a dashboard to monitor tutoring sessions and the webpage update service we provide, clearly showing which tutor is meeting with which student, when the session takes place, and other key details.

Lesson Hour Tracker

Lesson Schedule

We provide **one-on-one lessons** for our **VIP students**. Each bar in the calendar view contains details about a session, including the student, tutor, lesson status, duration, and remaining hours for the student.

This tracker is updated daily.

预习preview:	video with both English and Chinese subtitles
1.1 看视频，熟悉视频大意（中英字幕）	

1. preview: video with both English and Chinese subtitles

2. These detailed instructions can be skipped once students and users become familiar with the process, allowing them to move on to the study section.

正式学习:
2.1 标注: 听音频，以段落 (sections) 为单位。看字幕稿，遇到不熟悉的生词、词组、句式表达，暂停视频，在字幕稿上高亮标记 (可以直接高亮句子，以句子为单位去学习新的单词、词组。如果更习惯打印文稿、或者在其他笔记软件，如notability, goodnotes上学习，可以直接下载transcript。用电脑或者iPad的分屏功能学习)
How playing an instrument benefits your brain - ... lins.pdf 21.7KB
2.2 看懂: 查字幕稿中出现的生词&短语
words: 单词推荐欧路词典
phrases& idioms: 短语、句子推荐用AI (ChatGPT, Deepseek, 豆包 etc.)
prompts(提示语): 请提供_____的详细中文释义，并提供英文例子
a. 选中生词&短语，点击评论，在评论里添加注释，
b. 查完后一定要回到原句，划分句子结构(可借助AI)，确保自己能看懂生词&习语所在句子，
c. 熟读生词、短语所在句子: 建议听一遍录音后，开口读三遍以上
2.3 听懂: 不看字幕稿，再听一遍音频，理解每一句话。（遇到不理解的地方暂停，看字幕稿复习。建议重复练习至听懂90%以上内容）

3. The long transcript is divided into several shorter sections, making it easier for students to digest and learn paragraph by paragraph.

section 1	Speaking input
Did you know that every time musicians pick up their instruments, there are fireworks going off all over their brain? On the outside, they may look calm and focused, reading the music and making the precise and practiced movements required. But inside their brains, there's a party going on. How do we know this? Well, in the last few decades, neuroscientists have made enormous breakthroughs in understanding how our brains work by monitoring them in real time with instruments like fMRI and PET scanners.	预习preview:
section 2	正式学习:
When people are hooked up to these machines, tasks such as reading or doing math problems each have corresponding areas of the brain where activity can be observed. But when researchers got the participants to listen to music, they saw fireworks. Multiple areas of their brains were lighting up at once as they processed the sound, took it apart to understand elements like melody and rhythm, and then put it all back together into unified musical experience.	section 1

	section 7
	section 8
	复习review:
	Speaking output

4. Students and users are required to upload their audio or video assignments to the output section to track their progress and complete the ‘input-output’ language learning cycle.

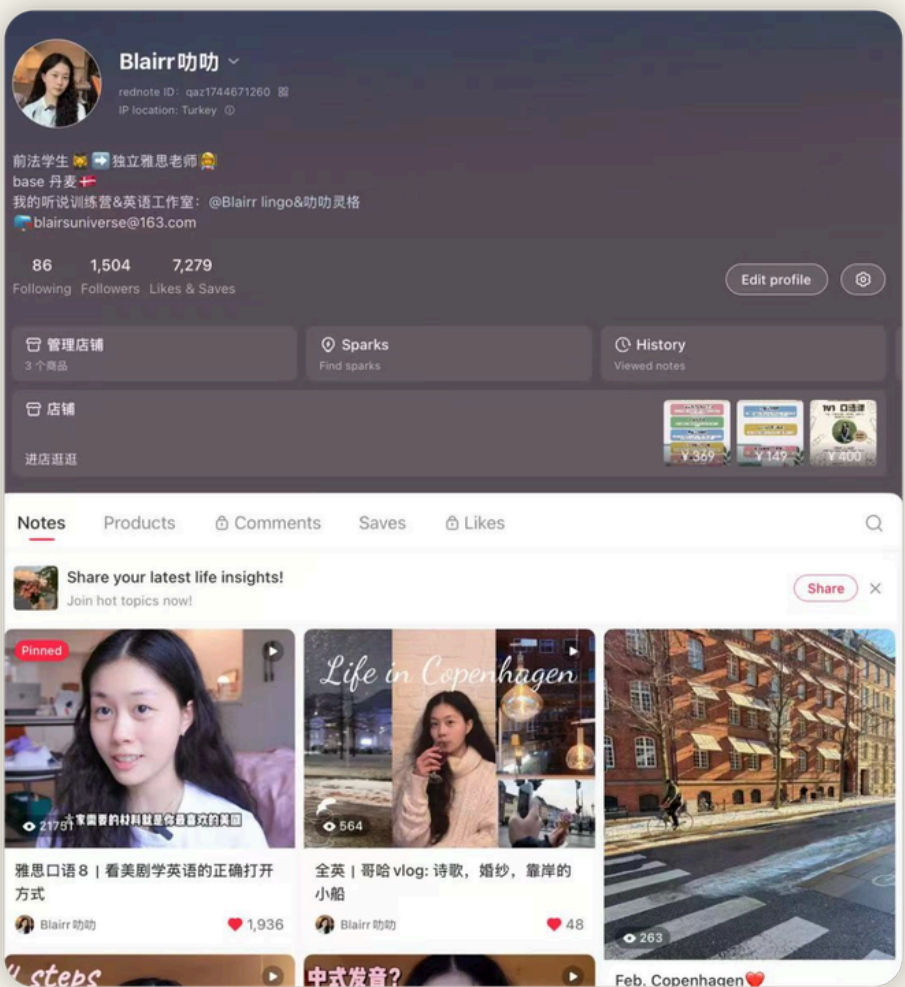

5. Example of a student’s study page, featuring her audio submission and our detailed feedback.

hometown	hometown I3
the cost of living	
transportation	
shopping aspect	
public activity	
booking a ride healing text (应为 hailing a ride)	
a plenty of (应为 plenty of / a lot of)	
I think there are several major differences between city life and countryside life. One obvious difference is the cost of living. In cities, rent is usually very high, even for a small apartment, while in the countryside you can live in a much bigger house at a lower cost.	
Another difference is transportation. Big cities usually have very convenient public transport, such as subways and buses, and you can easily hail a ride using your phone. In contrast, transportation options in the countryside are more limited, so owning a car is often necessary.	
There's also a difference in shopping and social activities. Cities offer more choices, like shopping malls, cafes, and community events, while the countryside tends to be quieter with fewer options.	

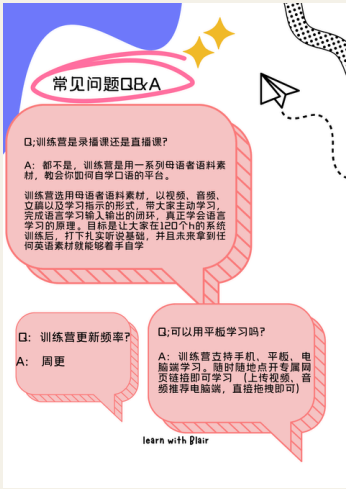

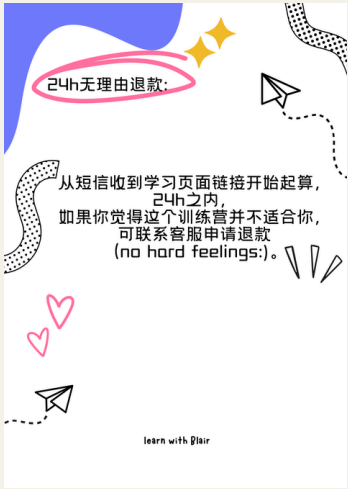

Marketing

social media marketing

I have accumulated over **1.5K followers** on Rednote, one of the most popular Chinese social media platforms, by **publishing video content** focused on language learning.

online store

In addition, I **launched an online store** to raise awareness of my small business.

These are some of the marketing posters I created using Canva.

Ending

Although I do not have formal corporate experience in project management, marketing, or business operations, I have been actively working in these areas through my own initiatives. Creating systems to streamline workflows and effectively communicate with stakeholders comes naturally to me.

I am eager to bring my skills and experience—while still developing—to the table and contribute to meaningful goals.

Thank you
